# Your AI upskilling specialist

Ready to elevate your career and personal development? ULISES offers a structured, pragmatic and immersive experience designed to enhance your expertise and skills in Artificial Intelligence.

Reinforce and consolidate your capabilities and know-how in a specific area relevant to your development goals and evolving business context.

**\*The duration of the Courses is 'indicative' can be customized depending on your needs and depth required.**

# Microsoft AI Foundry

Go beyond Copilot models. Orchestrate your AI.

Learn to build and orchestrate AI agents that solve real business problems. Explore model selection, customization, and fine-tuning, including retrieval-augmented generation (RAG). Gain practical skills in security, governance, and responsible AI to deploy solutions safely and effectively.

## Learning Objectives

- Build and orchestrate AI agents.
- Customize models with RAG and fine-tuning.
- Apply security and governance best practices.

## Target Audience

- AI/ML engineers and developers.
- Technical leads and solution architects.
- IT managers overseeing AI projects.

## Program Details

- COURSE DURATION: 1 Day
- DELIVERY MODE: On-premise / Online
- PRE-REQUISITES: Agentic AI Bootcamp is highly recommended.

\*The duration of the Courses is 'indicative'. It can be customized depending on Customer needs and depth required.

## PROGRAM SYLLABUS

- **Introduction to AI Foundry**
  - What is Azure AI Foundry
  - Basic terminology: what is an "agent", what is "RAG", what is fine-tuning, etc.
- **Model Catalog & Selection**
  - Exploring the model marketplace: open-source models, foundation models, industry / task-models.
  - Model comparison & evaluation: latency, throughput, cost, quality metrics, benchmarking.
- **Exploring AI Agents**
  - Agents in Foundry: types, capabilities.
  - Orchestration: single vs multi-agent workflows.
- **Fine-tuning & Customization**
  - Fine-tuning models: the options.
  - Using RAG: how to bring data into agent responses.
- **Security, Governances & Responsible AI**
  - Safety & trust: built-in security and compliance.
  - Monitoring, observability, evaluation.

# Start your training journey
